The Angel of the Annunciation

Simone Martini
Sienese, active from 1315; died 1344

The Angel of the Annunciation

c. 1330

tempera on poplar panel
painted surface (on recto): 29.5 x 20.5 cm (11 5/8 x 8 1/16 in.)
overall: 31 x 21.5 cm (12 3/16 x 8 7/16 in.)
painted surface (gesso ground on verso): 21 x 30.2 cm (8 1/4 x 11 7/8 in.)
framed: 54.6 x 32.9 x 4.1 cm (21 1/2 x 12 15/16 x 1 5/8 in.)
Samuel H. Kress Collection 1939.1.216

The painting represents the archangel Gabriel, who announces the birth of Jesus to the Virgin Mary. [1] It clearly presupposes a complementary image of the Virgin Annunciate in a separate panel, which in fact has always been recognized in the Virgin Annunciate now in the Hermitage in St. Petersburg [fig. 1]. The latter, identical to the Washington panel in format and in its ornamental punched decoration, comes from the Roman collection of Count Gregory Stroganoff (1829–1910) and entered the Hermitage after the collector’s death. [2] The two halves of the diptych probably were separated in the nineteenth century, given that the very similar state of conservation of the two panels suggests a similar fate: the paint surface of both was ruined by drastic overcleaning, probably at the time of their separation in the mid-nineteenth century, when they appeared on the Italian art market.

In 1901, when it was still in the Stroganoff collection in Rome, [3] Giovanni Bernardini recognized the Virgin Annunciate now in Russia, albeit with some uncertainty, as an autograph work by Simone Martini. It was almost unanimously [4] recognized as a work by the Sienese master after its display at Mostra dell’antica arte senese in the Palazzo Pubblico in Siena in 1904. Lionello Venturi then identified the image of the Angel of the Annunciation as the companion panel of the former Stroganoff Virgin Annunciate in 1935. [5] Venturi’s opinion was confirmed in manuscript opinions by Adolfo Venturi, F. Mason Perkins (both without date), Giuseppe Fiocco, and Wilhelm Suida (both dated 1938). [6] The first catalog
of the National Gallery of Art (1941) also accepted the attribution to Simone Martini, citing a written expertise by Roberto Longhi, who confirmed Simone’s authorship, and the opinion of Bernard Berenson, who rejected the attribution. [7] In the subsequent literature opinions were divided: numerous publications accepted the attribution to Simone, [8] even if many scholars preferred to speak of a product of the artist’s shop or at any rate showed some uncertainty about its autograph status. [9] Some even proposed alternative names for its artist. [10]

Rarely, however, has the problem of the diptych now divided between St. Petersburg and Washington been addressed in any systematic or analytic fashion. Art historians have mainly limited themselves to brief and categorical statements, without carefully weighing the evidence. In my view, it is precisely this superficial examination of the two panels, combined with the difficulties of evaluating them because of the marked abrasion of their paint surfaces, which accounts for the uncertainties in their attribution and date.

Almost all those who have cited the small panel in the Gallery and its companion, irrespective of their opinion regarding the attribution of the work, have agreed in assigning the two paintings to the years of Simone’s residence in Avignon. But its Avignonese origin has been asserted rather than proved, as if the profusion of gold, elaborate punched ornamental decoration, and refined elegance of poses were in themselves sufficient evidence that the two paintings belonged to the final phase in the art of Simone Martini—that is, to the period of his maximum exposure to the tendencies of the transalpine Gothic in such a flourishing cultural center as Avignon was at the time. Sometimes, however, pertinent observations apparently contradicting such an interpretation have been made. Fern Rusk Shapley (1966), for example, concluded her comment on the Gallery’s painting by declaring, “The style is, in any case, very close to that of Simone’s Annunciation of 1333, in the Uffizi”; and Andrew Martindale (1988), one of the few scholars to dedicate a thorough analysis to the style and form of the panels that concern us here, observed that the immensely elegant and elongated figure of Mary had more in common with the Virgin of the San Ansano altar (that is, the Annunciation in the Uffizi, Florence) than with that of the Holy Family (Christ Discovered in the Temple, dated 1342) in the Walker Art Gallery, Liverpool, and that “the images [of the St. Petersburg-Washington diptych] lack the robustness which spans the differences even between the Avignon frescoes, the Ambrosiana Virgil and the Liverpool Holy Family.” [11] Some objective data should also be taken into account: for example, as Brigitte Klesse (1967) pointed out, the pattern of the brocaded robe of the angel in

The Angel of the Annunciation
© National Gallery of Art, Washington
the panel in the Gallery recurs in that of the corresponding figure in the Uffizi
Annunciation. [12] Also, the punches used in the diptych divided between St.
Petersburg and Washington frequently recur in the Annunciation now in Florence
and in even earlier works, paintings that date to Simone’s period in Orvieto, for
example, but are seldom found in works that date to his Avignon period. [13]

To these observations, which prompt a reconsideration of the usual dating of the
diptych, we can add others that similarly suggest that the two panels are indeed
earlier than usually claimed. Let us first consider the St. Petersburg panel of the
Virgin Annunciate. Of course, the elimination of the Virgin’s throne especially
would have been prompted by the need to press the figure of Mary, like the angel
she confronts, into the foreground and bring her as close as possible to the
spectator. But the swiveled pose of her body clearly echoes that of the Madonna of
the Annunciation in the Uffizi (apparently the model that other Sienese paintings,
such as the Virgin Annunciate formerly in the Stoclet collection, imitate) [14] and not
that of the small panel in the Koninklijk Museum voor Schone Kunsten in Antwerp.
[15] The same may be said of the motif of the book held half-open by Mary, her
finger inserted between its pages as an improvised bookmark, and of the
proportions of the Virgin herself. Her figure is characterized by the pronounced
elongation of the bust and a smooth and placid contour formed of a succession of
long, slightly crescent lines, carefully avoiding any disturbing agitation of the hem
of her dress. A restless jagged cadence, by contrast, is a typical aspect of the
panels now divided among the museums in Antwerp, Berlin, and Paris; of the
illuminated frontispiece of the Virgil codex in the Biblioteca Ambrosiana; [16] and of
Christ Discovered in the Temple, a panel signed and dated 1342, in the Walker Art
Gallery in Liverpool. [17]

Rather similar observations can be made about the Washington panel of the
archangel Gabriel. In particular, the emphasis placed on the magnificent gold
embroidered robe, as on the proud pose of the heavenly messenger, kneeling but
only slightly bending forward as he proffers the olive branch with the tips of his
fingers to the Virgin, underlines the resemblance of the image to its counterpart in
the Uffizi. The face, with its mysterious expression accentuated by delicate slit eyes
that create the impression that the archangel is looking furtively and yet probingly
at Mary, and with his firmly clenched lips, may recall the face of the child Jesus in
the Liverpool panel; however, the fluid cadence of the draperies, their large and
sweeping folds animated only by the fluttering hem, seem to me to betray rather
different Intentions than those that inspired the artist during his period in Avignon.
In the Angel of the Annunciation in Antwerp, for example, the artist no longer seeks to dazzle the spectator with the glitter of the exotic oriental silk brocade worn by Gabriel but prefers instead to play with the matching of delicate tones of pink and pale purple, highlighting the mantle with the archaic medium of chrysography, which articulates the folds and underlines the forms more distinctly than the transparent lacquers painted on gold. These aspects, together with the extraordinary elegance of the drawing, seem to me to confirm that the Gallery panel and its companion panel in St. Petersburg (which, as far as it is possible to judge from their existing state, were painted by the same hand) [18] belong to the catalog of Simone’s autograph works, though to a phase preceding his journey to Avignon. That phase can be placed between the works executed in the early 1320s for Orvieto and the dated Uffizi Annunciation of 1333.

NOTES

presenting himself to the Virgin, with his left hand placed on his breast, as a “posa quasi indolente” (almost indolent pose), is a misinterpretation of the image. This gesture is in fact far from rare (cf. Ambrogio Lorenzetti’s Angel of the Annunciation in the church of Montesiepi) and should be interpreted as an expression of sincerity and inwardness. Cf. Marco Pierini, Simone Martini (Cinisello Balsamo, Milan, 2000), 207; Daniel Arasse, L’Annunciation italienne: Une histoire de perspective (Paris, 1999), 80–81; and François Garnier, Le langage de l’image au Moyen Age, vol. 1, Signification et symbolique (Paris, 1982), 184–185.

[2] No. GE 284; 30.5 × 21.5 cm.

[3] Giovanni Bernardini (1901) wrote that the small panel was “forse da attribuire al grande artista senese” (perhaps to be attributed to the great Sienese artist), presumably echoing Stroganoff’s own attribution. Giovanni Bernardini, “Alcuni dipinti della collezione del conte Stroganoff in Roma,” Rassegna d’arte 1 (1901): 119. The painting was then exhibited in Siena in 1904 as no. 38 in Room XXVII, under the name of Simone. Mostra dell’antica arte senese: Catalogo generale (Siena, 1904), no. 38. The attribution was accepted by F. Mason Perkins (1904), Adolfo Venturi (1907), Robert Langton Douglas (1908), Bernard Berenson (1909), and others. See F. Mason Perkins, “La pittura alla mostra d’arte antica a Siena,” Rassegna d’arte 4 (1904): 146; Adolfo Venturi, Storia dell’arte italiana, vol. 5, La pittura del Trecento e le sue origini (Milan, 1907), 629; Robert Langton Douglas, in A History of Painting in Italy from the Second to the Sixteenth Century, vol. 3, The Sienese, Umbrian, and North Italian Schools, by Joseph Archer Crowe and Giovan Battista Cavalcaselle (London, 1908), 69 n. 2; Bernard Berenson, The Central Italian Painters of the Renaissance, 2nd ed. (New York, 1909), 252.

[6] Copies of the opinions of Fiocco, Perkins, Suida, and Adolfo Venturi are in NGA curatorial files.

[13] According to the important (though unfortunately not always sufficiently precise) repertoire of Mojmir Svatopluk Frinta, Punched Decoration on Late Medieval Panel and Miniature Painting (Prague, 1998), the punches that decorate the panels of the Annunciation now divided between the Hermitage and the National Gallery of Art (namely, the motifs Frinta classified as “Da 10 a,” “J 26 b,” and “Jb 59”) seldom recur in the Orsini quadriptych, a work often assigned to the artist’s final phase. On the other hand, the same punches used in the Annunciation appear with some frequency in works executed by Simone for Orvieto (“Da 10 a,” “Fea 19,” “Gh 8,” “I 86 c,” “I 129 a,” “J 26 b,” and “Jb 59”) presumably during the third decade; and often also in such paintings as the altarpiece of the Blessed Agostino Novello, now in the Pinacoteca in Siena, usually dated to the second half of the 1320s or after, or the Annunciation in the Uffizi, Florence, of 1333 (“Da 10 a,” “Fea 19,” “Gh 8,” “I 86 c,” “I 129 a,” “J 26 b,” and “Ka 30 b”). Erling Skaug, who at my request very kindly examined the punch marks of the Saint Petersburg-Washington diptych, wrote in a letter of September 16, 2006, “Most likely the many punches in the diptych that were not used in the Orvieto polyptych means that the diptych is later—perhaps only a little later,” adding, “your suggestion of dating the diptych around 1330 seems just fine from the sphragiological point of view.”

[14] George Martin Richter, “Simone Martini Problems,” The Burlington Magazine for Connoisseurs 54 (1929): 166–173, published the small former Stoclet painting (25 × 17 cm), now in a private collection in the United States, as a work by Simone, but art historians generally rejected the proposal, restated in more recent years in the album Collection Adolphe Stoclet, vol. 1, Choix d’œuvres appartenant à Madame Feron-Stoclet: Préface de Georges A. Salles,...Avant-propos de Daisy Lion-Goldschmidt (Brussels, 1956), 86–88. In my view, the small panel, rarely cited in monographs on Simone (although cf. Contini and Gozzoli 1970, where it is considered as belonging “alla cerchia di Simone in senso lato” [in the circle of Simone in the broadest sense], and sometimes referred to Naddo Ceccarelli (De Benedictis 1974), could be a product of the shop of Andrea di Vanni (Sienese, c. 1330 - 1413); in any case, it suggests that Sienese artists were familiar with the Hermitage-Gallery diptych. See Gianfranco Contini and Maria Cristina

[15] The panel in question is one of six small panels now divided among the Koninklijk Museum voor Schone Kunsten in Antwerp (Angel of the Annunciation and The Descent from the Cross, originally on the back of the same panel; Virgin Annunciate and Crucifixion, originally on the back of the same panel); the Louvre, Paris (The Carrying of the Cross to Calvary); and the Gemäldegalerie in Berlin (The Entombment). They were components of a folding altarpiece that bore the signature of Simone and the coats of arms of the Orsini family; cf. Hendrik W. van Os and Marjan Rinkleff-Reinders, “De reconstructie van Simone Martini’s zgn. Polyptiek van de Passie,” Nederlands kunsthistorisch jaarboek 23 (1972): 13–26. Most scholars have considered this quadriptych a late work, executed c. 1335–1340, even though some have proposed a dating to the third decade or even earlier, such as Marco Pierini, Simone Martini (Cinisello Balsamo, Milan, 2000), 206–208, 242 nn. 30, 32, and others; see Joseph Polzer, “Simone Martini’s Orsini Folding Polyptych: Place of Origin and Date and Its Relation to the 1333 Uffizi Annunciation, 1,” Arte cristiana 98, no. 860 (2010): 321–330; and Joseph Polzer, “Simone Martini’s Orsini Folding Polyptych: Place of Origin and Date and Its Relation to the 1333 Uffizi Annunciation, 2,” Arte cristiana 98, no. 861 (2010): 401–408. As far as I am able to see, however, stylistic evidence decisively contradicts this hypothesis.

[16] The title page of ms. A 79 inf. in the Biblioteca Ambrosiana in Milan was commissioned by Petrarch, as attested by an autograph note on the back, following the recovery in 1338 of the manuscript that had been stolen from him. Cf. Bernhard Degenhart and Annegrit Schmitt, Corpus der italienischen Zeichnungen 1300–1450, 8 vols. (Berlin, 1980–1990), 2, pt. 2:319–331; Pierluigi Leone De Castris, Simone Martini (Milan, 2003), 364.

[18] On the occasion of the opening of the National Gallery of Art, Richard Offner expressed a withering judgment of the painting in a review he wrote for Art News, but the magazine preferred not to publish it (copy of the proofs in NGA curatorial files). Offner described “a superannuated pigment streaked over the outlines...[which] disfigures the fourteenth century original. The remaining surface seems to have been subjected to successive abrasions.... Hence, partly through modern additions, partly because they never were there, the shapes and the rhythms of Simone are nowhere in evidence.” Of course, these lines reflect the panel’s state in 1941, and we don’t know what Offner thought after its cleaning in 1955 or whether his reservations about the Angel of the Annunciation also applied to the Virgin Annunciate in the Hermitage. Some art historians in more recent years have tried to identify
TECHNICAL SUMMARY

The support is a single, vertically grained poplar panel [1] on which fine fabric has been applied on both sides. Both the obverse and the reverse were prepared with a gesso ground on which a thin layer of red bole was laid; this in turn was overlaid on the obverse by gold leaf. The main lines of the figure were incised in the gesso preparation. The designs of the brocade were realized with sgraffito technique; the halo and the decorative borders were punched. The paint, with the exception of the flesh, was laid over the gold leaf. [2] The feathers of the angel's wings were articulated with incised lines. The flesh tones were applied over a green underlayer. The reverse, also decorated by punch marks [fig. 1], was originally gilded with silver. [3] The panel exhibits a very slight convex warp and is damaged by a crack running downward from the center of the top edge for approximately 10 cm. The engaged frame of the panel is lost, and the part of the wooden support it covered is exposed on all sides. There are small losses in the gold ground and in the painted surface along the edges. The paint and glazes are generally very abraded. Inpainting can be noted in the angel's right hand, in his face, and in the red floor. The painting is said to have been "cleaned, restored slightly and

[1] The NGA scientific research department identified the wood as poplar (see report dated September 16, 1988, in NGA conservation files).

[3] The NGA scientific research department analyzed the reverse of the painting using x-ray fluorescence spectometry (XRF). Strong peaks for silver were found (see report dated February 29, 2012, in NGA conservation files).

[5] The information on Pichetto’s treatment seems to have been confirmed by Lionello Venturi’s letter to the restorer, dated February 1936 (copy in NGA curatorial files), reporting the discovery of the panel discussed here. Evidently, soon afterward it was handed over to Pichetto for “putting in order.” The “Condition and Restoration Records” of the Samuel H. Kress Collection (copy in NGA curatorial files) also mention “some restoration” carried out by Pichetto, adding, “1955 . . . M. Modestini removed the varnish and all of the overpaints. . . . The cleaning disclosed that considerable original paint had been overcleaned several centuries ago.” For the testimony of such an acute observer as Richard Offner on the painting’s state at the time of its arrival in the National Gallery of Art, see Entry note 18.

PROVENANCE

The back of the painting bears a paper label printed with a coat of arms with three Moors’ heads in profile and the coronet of a viscount above. Underneath is painted the name CANNING. As Ellis Waterhouse’s note of 1980 (in NGA curatorial files) informed the Gallery, this can only refer to Charles John Canning; on Canning see also Bernard Burke, A Genealogical and Heraldic Dictionary of the Peerage and Baronetage of the British Empire, 24th ed., London, 1862: 171.

The paper label also is inscribed with the handwritten name of Lady Margaret Beaumont and the number 32. According to Waterhouse’s note, this can only be Margaret Anne de Burgh, daughter of Ulick John de Burgh, 1st Marquess of Clanricarde, and of Harriet Canning, sister and heir of Charles John Canning. Margaret Anne married Wentworth Blackett Beaumont (1829-1907) in 1856. The painting probably was inherited by their son, Wentworth Canning Blackett Beaumont.

Lascelles is named in Lionello Venturi’s February 1936 letter to the restorer Stephen Pichetto (copy in NGA curatorial files) as the person from whom “about two years ago,” i.e., in c. 1934, the painting was acquired by the unnamed person (Venturi) who owned it in February 1936. Lascelles was a grandson of Lady Elizabeth Joanna de Burgh (a sister of Margaret Anne de Burgh Beaumont), who had married Henry Thynne Lascelles, 4th earl Harewood, who became the heir of Elizabeth’s and Margaret’s unmarried brother, Herbert George de Burgh-Canning, 2nd (and last) marquess of Clanricarde. However, according to Ellis Waterhouse (see note 1) the Washington panel “didn’t belong ever to the Earl of Harewood (it was one of the few Clanricarde pictures which didn’t).” Indeed, the panel is not included in Tancred Borenius’ catalogue of the Harewood collection; the introduction indicates that the 2nd marquess of Clanricarde bequeathed to Lascelles mainly pictures by English eighteenth-century masters; see Tancred Borenius, Catalogue of the pictures and drawings at Harewood House and elsewhere in the collection of the Earl of Harewood, Oxford, 1936: vii.
